Our mission statement for sustainability

"Consistence and safety" is our core value.

Hu Pao was established in 1999 and is specialty nuts manufactory. With our "high quality, good service, and short lead time," we've extended our business reach to the automotive fastener market. We hope to continuously offer Taiwanese industries enhanced quality, improved core technology and new products. In order to keep the pace with market changes, we've also introduced IoT, integrated management platform, etc. to increase our competitive edge and combined the concept of green energy to continue product innovation & R&D and achieve sustainable operation.

ESG Environment
Social
Governance

Outlooks

Hu Pao has been following the core value of sustainable development goals (SDGs) for years. With energy transition being gradually valued by industries, we'll be more actively involved in the green energy industry and use green energy as replacement for petrochemical fuel, which is not only environmentally friendly and reduces the greenhouse gas emission, but also can make the most of Nature's circulation to continuously produce energy. We've successfully entered the solar energy and wind power markets. In the future we'll continue to improve our products to meet the demand of green energy related industries and hope to become a topnotch supplier of nuts for global solar energy and wind power facilities.

Zero carbon emission

Combine zero carbon emission with continuous product innovation for transformation

Environment and energy

Build an environment and energy management system and gradually reduce carbon emission year after year to net zero

Social care

Continuous participation in social care activities for social responsibility fulfilment

Sustainable development

Reinforce execution of sustainable development and revigorate relationships with global partners dedicated to sustainable development

Milestones of Hu Pao

1999
Hu Pao was established with a 2,645sqm plant in Rende.

2006
Certified by car manufacturers' suppliers

2007
Received orders from the automotive market

2016
Entered the solar energy fastener market

- 1999 Hu Pao was established
- 2001 Bai-Nien Wang took the position of President and reorganized the corporate operation
- 2004 Expanded our finished products warehouse and packaging plant on Kaifa 6th Rd.
- 2005 Company renamed to Hu Pao Industries Co., Ltd.
- 2006 TS 16949 certified
- 2007 Acquired big orders from European and U.S. leading car manufacturers.
- 2008 Established notch pressing procedure
- 2011 Established optical sorting procedure
- 2016 Extended production to solar energy locknuts
- 2017 Extended production to small wind turbine locknuts
- 2018 IATF 16949 certified
- 2019 Honored with the 5th Taiwan Mittelstand Award
- 2020 Accepted by "Intelligent Machinery-Industry Cluster Supply Chain Digital Streaming & AI Application Program" of IDB, MOEA
- 2021 The 16,529 sqm Guiren-based plant was inaugurated
- 2022 Accepted by "Subsidies on Industries for Developing International Market Program" of Bureau of Foreign Trade, MOEA

2017
Entered the wind turbine fastener market

2019
Honored with the 5th Taiwan Mittelstand Award

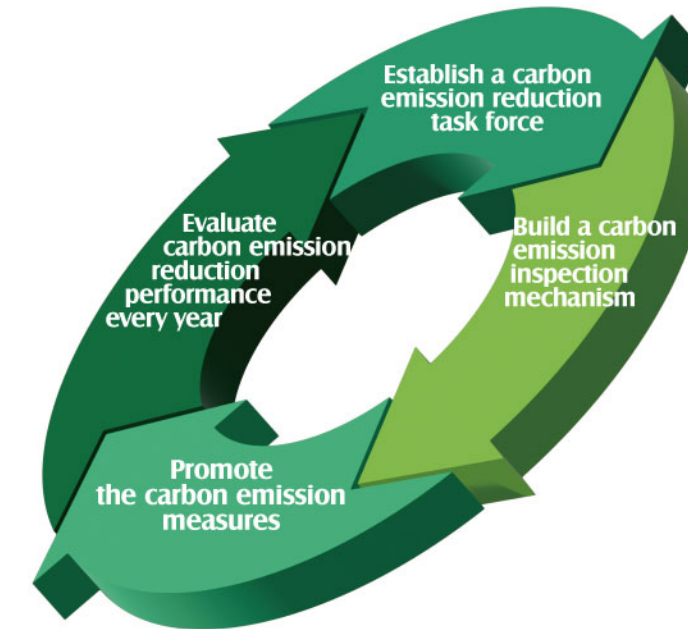

2021
The 16,529 sqm Guiren-based plant was inaugurated.

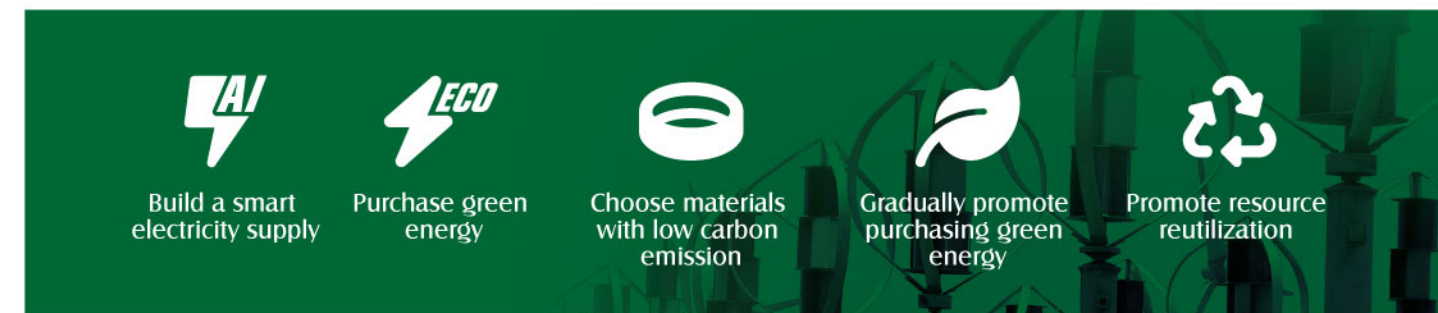

2022
Working hard to promote ESG for the goal of sustainability

Future carbon emission reduction process

Carbon emission reduction measures

Public announcement

Carbon-neutrality oriented management and becoming the provider of low carbon solutions for the fastener industry.

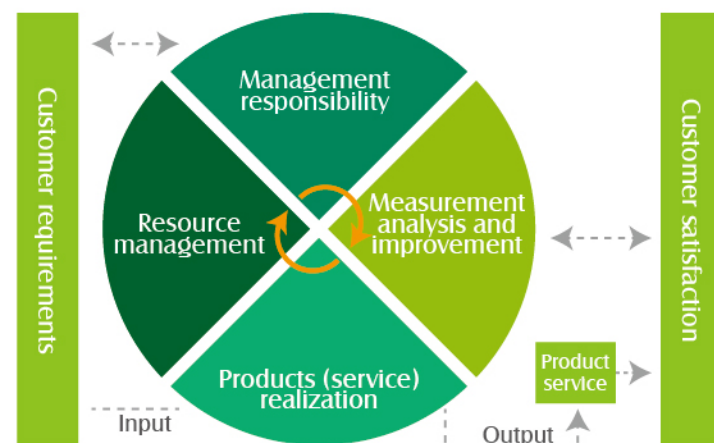

Accurate measurement, guaranteed quality, superior products, a win-win situation

We carry out batch no. control and record manufacturing parameters and material supply in the optimized ERP system, so we can trace our products to the upstream or the downstream, monitor product safety, and establish reports for complete traceability.
